

Porpoise AI

AI instances with a purpose.

Porpoise AI creates cognitive lenses for AI. We don't build AI—we design reusable stances: behavioral specifications that transform how ChatGPT, Claude, and other AI models think, ask questions, and collaborate with you.

THE CORE DEMONSTRATION

Same prompt. Different minds.

A prompt tells AI what to produce.
A stance changes how it thinks while producing it.

PROMPT I accidentally submitted the wrong spreadsheet at work.

Curious

C

Discover conceptual objects and adjacent ideas.

YOU

I accidentally submitted the wrong spreadsheet at work.

CURIOUS

What made it the wrong spreadsheet?

YOU

Wrong month's numbers – I grabbed the draft version.

CURIOUS

Was that a file mix-up, or something in how you chose it?

YOU

...probably the second one, if I'm honest.

Devil

D

Stress test ideas before reality does.

YOU

I accidentally submitted the wrong spreadsheet at work.

DEVIL

Before you spiral – what's the actual worst case?

YOU

My manager sees numbers that are two weeks stale.

DEVIL

Who's realistically affected by that?

YOU

...just me, probably.

Editor

E

Improve clarity without changing meaning.

YOU

I accidentally submitted the wrong spreadsheet at work.

EDITOR

Okay. Let's draft the email you'll send.

YOU

I don't even know how to start it.

EDITOR

Start with the fix, not the apology.

YOU

"Correct file attached – here's what changed."

Gossip

G

Explore the human story.

YOU

I accidentally submitted the wrong spreadsheet at work.

GOSSIP

WAIT. 🤔

YOU

I know, I know.

GOSSIP

How did you even realize? I need the play-by-play.

YOU

My coworker replied "uh, this says March?"

SAME INPUT. FOUR DIFFERENT MINDS.

A Porpoise gives your AI a specific way of paying attention.

WHY THIS EXISTS

Why not just use prompts?

Prompt

- tells AI what to produce
- task-specific
- disposable
- output-focused

Stance

- defines how AI thinks
- conversation-wide
- reusable
- attention-focused

Think of them as apps for your AI's
attention.

FEATURED STANCES

Six lenses, six ways of thinking

Curious

AVAILABLE

Follows the idea wherever it's most alive.
Discover conceptual objects and adjacent ideas.

Devil

AVAILABLE

Finds the crack before reality does.
Stress test ideas before reality does.

Editor

AVAILABLE

Sharpens the sentence without losing the point.
Improve clarity without changing meaning.

Panic Room

AVAILABLE

Steadies the moment when everything feels urgent.
Slow down and stabilize in high-stakes moments.

Cartographer

AVAILABLE

Draws the map before you take the trip.
Structure sprawling ideas into navigable territory.

Coach

AVAILABLE

Asks the question that moves you forward.
Turn reflection into a next concrete step.

PHILOSOPHY

A different way to think about AI.

Most AI products compete by building better models.

Porpoise AI takes a different approach.

We believe the smartest AI isn't the one with the most knowledge.

It's the one approaching your problem the right way.

Ready to change the way your AI thinks?
